

**MOVING  
COLD AIR  
FURTHER THAN  
ANY OTHER**

# ATTIC MASTER

Attic Master delivers cool air to confined, high ambient areas. Pump cold air to difficult to reach, crawl spaces, attics, storage tanks, and aircraft. This portable is a commercial grade 13,700 BTU unit that operates on a 115v - 15 amp circuit using a 50ft power cord. Move cool air up to 90 feet through a 6" duct specially designed to prevent unwanted condensation.

## Capable up to 90 feet!

### Quick Installation

Attic Master can be set up quickly using its 30 ft. extension cord. Also included is Attic Master's specially designed 30 ft. duct in a 6 in. diameter.

### Advanced Cooling

This commercial-grade air conditioner is the ideal choice for spot cooling people or equipment in a high ambient environment, making it ideal for warehouses, workstations and attics.

### Versatile Utility

Complete with heavy-duty locking casters for convenient mobility, this commercial unit can be transported wherever you need relief, and easily fits through doorways.

### Solid Construction

Constructed of fully-insulated, galvanized steel and an exclusive scratch resistant epoxy finish. This unit can cool spaces in the harshest of environments.

### Condensate Cutoff

Convenient 2.5 gallon condensate tank with automatic float switch cutoff.

## YOUR UTILITY MASTER

**PORTABLE  
SPOT COOLER**

The Attic Master is made to easily transport by standard work vans and trucks. Equipped with heavy duty 8" wheels along with a wide steel handlebar, make moving the unit a breeze.

**ATTICS AIRCRAFT INDUSTRIAL STORAGE TANKS**
